Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Wilton Reassurance Life Company of New York (the Company) are presented on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services (the Department).

The Department recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the New York Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual (NAIC SAP), has been adopted as a component of prescribed or permitted practices by the Department.

New York regulation 172 requires the Company to record a write-in asset of $2,651,954 and $3,467,726 related to the premiums for reinsurance paid beyond the paid-to date of the underlying policy at December 31, 2021 and December 31, 2020, respectively. These amounts would be refunded to the Company by the reinsurer in the event of policy termination.

The Department granted the Company a one-year waiver to performing the Principals Based Reserving according to Insurance Regulation 213 with interest, mortality and other assumptions applied in compliance with statutory regulations, for the following policies:

- Certain guaranteed term policies issued on or after May 13, 2019, and all guaranteed term policies issued on or after October 1, 2019
- Certain universal life and whole life policies issued on or after October 1, 2019
- All remaining life policies issued on or after January 1, 2020

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of New York is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations with mortality and morbidity risk are recognized as revenue when received. Premiums received from annuity policies with no mortality or morbidity risk are recorded using deposit accounting. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company follows these accounting policies:

(1) Short-term investments are stated at amortized cost.

(2) Bonds not backed by other loans are stated at amortized cost in accordance with the valuation prescribed by the Department and the NAIC. For other than temporary impairments, the cost basis of the bond is written down to fair market value as a new cost basis and the amount of the write down is accounted for as a realized loss.

(3) Common stocks are valued at fair value except that investments in the common stock of wholly owned subsidiaries and affiliates are carried on the equity basis, adjusted to reflect application of statutory principles.

(4) Highest-quality or high-quality redeemable preferred stocks (NAIC designations 1 and 2) are valued at amortized cost. All other redeemable preferred stocks (NAIC designations 3 to 6) are reported at the lower of amortized cost or fair value.

Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern (Continued)

Perpetual preferred stocks are reported at fair value, not to exceed any stated call price.

(5) Mortgage Loans on real estate are stated at the aggregate unpaid balance, excluding accrued interest.

(6) Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. Significant changes in estimated cash flows are accounted for using the retrospective method.

(7) The Company did not hold any investments in subsidiary, controlled and affiliated (SCA) entities.

(8) The Company has minor ownership investments in joint ventures, partnerships and limited liability companies, which are classified as other invested assets on the balance sheet. The Company values these interests based on its proportionate share of the underlying audited GAAP equity of the investee or, if audited GAAP basis financial statements are not available for the investee, may be recorded based on the underlying audited U.S tax basis equity, in accordance with SSAP No. 48 - Joint Ventures, Partnerships and Limited Liability Companies.

The investment is recorded at cost, plus subsequent capital contributions, and adjusted for the Company's share of the investee's audited GAAP basis earnings or losses and other equity adjustments, less distributions received. Distributions are recognized in net investment income to the extent they are not in excess of the undistributed accumulated earnings attributed to the investee. Distributions in excess of the undistributed accumulated earnings reduce the Company's basis in the investment.

(9) All derivatives are stated at fair value.

(10) The Company evaluates whether losses, loss adjustment expenses (LAE), and maintenance expenses exceed the recorded unearned premium reserve generally adjusted for anticipated investment income. If such condition exists, the Company records an additional liability for the deficiency, with a corresponding charge to net income. Insurance contracts are grouped in a manner consistent with how policies are marketed, serviced and measured.

(11) Unpaid losses and LAE include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for the losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.

(12) The Company has not modified its capitalization policy from the prior period.

(13) The Company has no pharmaceutical rebate receivables.

D. Going Concern

In accordance with SSAP No. 1, Accounting Policies, Risks & Uncertainties, and Other Disclosures, management has evaluated the Company's ability to continue as a going concern and has identified no issues which would impede the Company's ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors - Not Applicable

3. Business Combinations and Goodwill

A. Statutory Purchase Method - Not Applicable

B. Statutory Merger

On March 29, 2021, the Company's parent, Wilton Reassurance Company (WRAC), entered into a Stock Purchase Agreement (Purchase Agreement) with Allstate Life Insurance Company (ALIC), Allstate Insurance Company (AIC), Allstate Financial Insurance Holdings Corporation (AFIHC), and Allstate Insurance Holdings, LLC (AIH) to acquire the Allstate Life Insurance Company of New York (ALICNY), a wholly owned subsidiary of ALIC domiciled in New York, and Intramerica Life Insurance Company (Intramerica), a wholly owned subsidiary of AFIHC domiciled in New York (the Acquisition).

D. Loan-Backed Securities

(1) For fixed-rate agency mortgage-backed securities, Clearwater Analytics calculates prepayment speeds utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs). MIMs are derived from a semi-monthly dealer-consensus survey of long-term prepayment projections. For other mortgage-backed, loan-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody's Analytics. Moody's applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody's projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors' models.

The Company closely monitors all assets that are trading at an unrealized loss of at least 10% or $200,000, as well as all assets that have been in an unrealized loss position for six months or more.

For loan-backed securities, the categories of information considered when reaching conclusions as to whether impairments are not other-than-temporary may include the following: projected cash flows; pre-payment speeds; delinquency, default and severity rates; average borrower credit ratings; loan to value ratios; debt service coverage ratios; quality of the underlying collateral; cumulative losses in the underlying collateral pool; credit enhancement for the tranche owned and contractual allocation of losses to the tranche under varying circumstances; geographical distribution of collateral and expectations regarding general economic conditions, including home price appreciation and the effect of government programs on future cash flows.

8. Derivative Instruments

A. Derivatives under SSAP No. 86 - Derivatives

(1) The credit risk of call options is the risk that the seller of the option will not pay the in-the-money value of the option, if any, when exercised. The Company limits this risk by monitoring its counterparty exposure, utilizing multiple counterparties and purchasing options from dealers we believe to be creditworthy. The Company includes option exposures with its securities holdings in determining compliance with the single issuer limitations in its investment guidelines. Since the option holder is not required to exercise a call option, the market risk is limited to the market value of the option. No funds or collateral are required of the purchaser of a call option other than the initial cost of the option.

(2) The Company purchases and writes option contracts to hedge the equity exposure contained in equity indexed life product contracts that offer equity returns to contract holders.

(3) The purchased and written option contracts are accounted for as fair value hedges. The change in the fair value of purchased/written option contracts is reported as net investment income, with an adjustment to derivative assets/liabilities. The gain or loss on the cash settled exercise of a purchased/written index option contract is reported in net investment income. If the purchased/written option contract expires without being exercised, the premiums paid/received are reported in net investment income and the corresponding asset/liability previously recorded is reversed.

(4) Derivative contracts with financing premiums - Not Applicable

20. Fair Value Measurements

A. Fair Value Measurement

The Company's financial assets measured and reported at fair value have been classified, for disclosure purposes, based on a hierarchy defined by authoritative guidance. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1 – includes assets valued using inputs that are quoted prices in active markets for identical assets.

Level 2 – includes assets valued using inputs that are quoted prices for similar assets in an active market, quoted prices for identical or similar assets in a market that is not active, observable inputs, or observable inputs that can be corroborated by market data. Level 2 assets include those financial instruments that are valued by independent pricing services using models or other valuation methodologies. These models are primarily industry-standard models that consider various inputs such as interest rate, credit spread, reported trades, broker/dealer quotes, issuer spreads and other inputs that are observable or derived from observable information in the marketplace or are supported by observable levels at which transactions are executed in the marketplace.

Level 3 – includes assets valued using unobservable inputs that are used in model-based valuations that contain management assumptions. Level 3 assets include those financial instruments whose fair value is estimated based on non-binding broker prices or internally developed models or methodologies utilizing significant inputs not based on, or corroborated by, readily available market information.

At each reporting date, the Company classifies assets into the three input levels based on the lowest level of input that is significant to the measurement of fair value for each asset reported at fair value. This classification is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction and overall market conditions. The Company's assessment of the significance of a particular input to the fair value measurement and the ultimate classification of each asset requires judgment.

(1) Fair value measurements at reporting date

The Company has no liabilities and only has a limited number of assets that are measured and reported at fair value in the statement of financial position. The assets held and reported at fair value at December 31, 2021 comprise the following:

(3) The Company's policy is to recognize transfers into and out of levels within the fair value hierarchy at the end of the period in which the actual event or change in circumstances that caused the transfer occurs.

(4) The Company determines fair value for its investments using various valuation methodologies in accordance with those permitted by the Purposes and Procedures Manual of the NAIC Securities Valuation Office. Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, Incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment, which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent In a particular methodology, model or input used.

(5) As of December 31, 2021 the reported net fair value of the Company's investment in Level 2 options was $2,468,586. The Company measured the fair value of options based on the consideration of several inputs including closing exchange or over-the-counter market price quotations; time value and volatility factors underlying options; market interest rates; and non-performance risk.

B. Other Fair Value Disclosures

As the Company is responsible for the determination of fair value, monthly quantitative and qualitative analysis on the prices received from third parties are performed to determine whether the prices are reasonable estimates of fair value. The Company's analysis Includes: (i) a review of the methodology used by third party pricing services; (ii) a comparison of pricing services' valuation to other pricing services' valuations for the same security; (iii) a review of month to month price fluctuations; (iv) a review to ensure valuations are not unreasonably stale; and (v) back testing to compare actual purchase and sale transactions with valuations received from third parties. As a result of such procedures, the Company may conclude the prices received from third parties are not reflective of current market conditions. In those Instances, the Company may request additional pricing quotes or apply internally developed valuations. However, the number of instances is insignificant and the aggregate change in value of such investments is not materially different from the original prices received.

C. Fair Values for All Financial Instruments by Level 1, 2 and 3

As of December 31, 2021, the aggregate fair value of all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall were as follows:

F. Subprime-Mortgage-Related Risk Exposure

(1) Classification of mortgage related securities is primarily based on information from outside data services. Certain characteristics are utilized to determine if a mortgage-backed security has sub-prime exposure.

Typical characteristics of mortgage-backed securities with sub-prime exposure are:

- Low average FICO score (< 650).
- High weighted average coupon relative to other mortgage-backed securities of similar average loan age and issue date.
- High percentage of loans with prepayment penalties (> 50%).
- Prospectus supplement indicates that underwriting standards are not "traditional", particularly with respect to credit and risk. Specific items discussed may include loan-to-value ratios, bankruptcy and foreclosure histories, and debt-to-income ratios.
- Issuer is one of several established sub-prime lenders.
- High percentage of ARM loans are 2/28 or 3/27 hybrid loans.
- High weighted average margin for ARM loans (typically > 5%).
- Very high percentage of full documentation loans (> 75%).
- Very low percentage of non-owner occupied properties (<6%).

Management practices

Credit discipline and ongoing surveillance underlie our asset manager's buy/hold/sell decisions for sub-prime securities.

Our analyses include the following:

- Asset screens identify securities with specific and quantifiable risks.
- Hybrid quantitative and qualitative credit models analyze loan-level collateral composition, historical underwriter performance trends, the impact of macroeconomic factors, and issuer risks.
- Security cash flows are estimated by running credit/prepayment model outputs through cash flow waterfall and by stress testing the capital structure under various loss and prepayment scenarios.
- Third party credit, liquidity, and other idiosyncratic risks are assessed as part of a general relative value analysis.
- Surveillance and risk management is ongoing on a security level and includes monthly model calibrations.

As of December 31, 2021, the unrealized losses on the Company's subprime exposure are attributable to changes in asset values versus exposure to realized losses resulting from receiving less than anticipated cash flows or due to the potential sale of assets required to meet future cash flow requirements.

31. Reserves for Life Contracts and Annuity Contracts

1. In general, the Company calculates reserves using interpolated terminals plus unearned modal net premium with the immediate payment of claims. In some limited circumstances, the Company reports values provided by other companies using mean reserves. As such, deferred premiums are minimized. Where mean reserves are used, the Company waives deduction of deferred and fractional premiums upon death of the insured. Regardless of which reserving methodology is used, the Company returns any portion of the final premium beyond the date of death and calculates a separate reserve for this amount. Any surrender values in excess of the legally computed reserves are not split out separately.

   Reserves for deposit-type funds are equal to deposits received and interest credited to the benefit of contract holders, less withdrawals that represent a return to the contract holder. Tabular interest on deposit-type funds is calculated as the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation.

   Claim reserves, including IBNR claims, represent management's estimate of the ultimate liability associated with unpaid policy claims, based upon analysis of past experience. To the extent the ultimate liability differs from the amounts recorded, such differences are reflected in operations when additional information becomes known.

Notes to the Financial Statements

31. Reserves for Life Contracts and Annuity Contracts (Continued)

2. Extra premiums are charged for policies issued on substandard lives. These extra premiums are in addition to the gross premium for the true age. Reserves are determined by computing the regular reserves for the plan using the valuation mortality increased by any table ratings. Reserves for any flat extras are held at unearned premium. For any substandard annuity contracts for which it maintained appropriate documentation, the Company uses the standard mortality table rates with a constant addition at each valuation date that adjusts the standard mortality table rates equal to the original underwriting estimate. This process results in an extra mortality assumption that over time gradually declines, and substandard reserves eventually grade into standard reserves.

3. At December 31, 2021 and 2020, the Company had $2,315,336,877 and $2,605,838,946respectively, of insurance in force in which the gross premiums were less than the net premiums according to the standard valuation set by the state of domicile. Reserves to cover the above insurance totaled the gross amount of $53,849,010 and $56,393,292 at yearend 2021 and 2020, respectively, and are reported as miscellaneous reserves in Exhibit 5.

4. The Tabular Interest has been determined by formula as described in the instructions, adjusted to reflect fractional years of interest for material reinsurance transactions. The Tabular Less Actual Reserve Released calculation and the Tabular Cost have been determined by formula as described in the instructions.

5. For the determination of Tabular Interest on funds not involving life contingencies for each valuation rate of interest, the tabular interest is calculated as the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation, adjusted for any significant reinsurance assumptions or cessions occurring during the year.

6. Details for Other Changes

At December 31, 2021 and December 31, 2020, the Company recorded gross asset adequacy reserves of $1,374,000,000 and $1,683,000,000, respectively. After reinsurance, the net asset adequacy reserves were $127,000,000 and $275,000,000, respectively for 2021 and 2020. The change in this net reserve, included in the Summary of Operations, was a $97,389,456 decrease and a $113,000,000 increase for 2021 and 2020, respectively.

(2) Separate account assets legally insulated from the general account claims

In accordance with the products/transactions recorded within the separate account all assets are considered legally insulated from the general account. The assets legally insulated from the general account as of December 31, 2021, are attributed to the following product/transactions:

(In accordance with the guarantees provided, if the investment proceeds are insufficient to cover the rate of return guaranteed for the product, the policyholder proceeds will be remitted by the general account.)

Some of the Separate Account liabilities are guaranteed by the General Account. To compensate the General Account for the risk taken on variable annuity products, the Separate Accounts paid risk charges as follows for the past five years:

35. Separate Accounts (Continued)

B. General Nature and Characteristics of Separate Accounts Business

Variable annuity and variable life business allow the contractholder to accumulate funds within a variety of portfolios, at rates which depend upon the return achieved from the types of investments chosen. The net investment experience of the Separate Accounts is credited directly to the contractholder and can be favorable or unfavorable. The assets of each portfolio are held separately from the other portfolios and each has distinct investment objectives and policies. Absent any contract provision wherein the Company provides a guarantee, the contractholders of the variable annuity and variable life products bear the investment risk that the Separate Account's funds may not meet their stated investment objectives. Variable annuity and variable life business is included in the Nonguaranteed Separate Accounts column of the following tables.

The Separate Account for Modified Guaranteed Annuity (MGA) products provides the opportunity for the contractholder to invest in one or any combination of up to ten interest rate guarantee periods. Amounts withdrawn from the contract in excess of the free withdrawal amount are subject to market value adjustments. MGA business is included in the Nonindexed Guarantee Less than/equal to 4% or the Nonindexed Guarantees More than 4% column of the following tables.

In connection with the disposal of certain of the Company's variable annuity contracts to Prudential Insurance Company of America (Prudential), there is a modified coinsurance reinsurance agreement under which those Separate Account assets and liabilities remain in the Company's Assets and Liabilities, Surplus and Other Funds pages, but the related results of operations are fully reinsured to Prudential and presented net of reinsurance in the summary of operations. In contrast, assets supporting General Account liabilities, including the future rights and obligations related to benefit guarantees and fixed rate of return fund investments, have been transferred to Prudential under the coinsurance reinsurance provisions. The reinsurance agreements do not contain limits or indemnifications with regard to the insurance risk transfer, and transferred all of the future risks and responsibilities for performance in the underlying variable annuity contracts to Prudential, including those related to benefit guarantees and fixed rate of return fund investments, in accordance with SSAP No. 61R. The Separate Accounts balances related to the modified coinsurance reinsurance were $268,643,989 and $267,264,320 as of December 31, 2021 and 2020, respectively. The General Account ceded reserve balances reinsured to Prudential under the coinsurance reinsurance were $163,363,485 and $160,714,556 as of December 31, 2021 and 2020, respectively, and consisted of the liabilities for fixed rate of return fund investments and benefit guarantees.
