Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Wilton Reassurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Minnesota Department of Commerce (the Department).

The Department recognizes only statutory accounting practices prescribed or permitted by the State of Minnesota for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Minnesota Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual (NAIC SAP), has been adopted as a component of prescribed or permitted practices by the Department.

The Department granted the Company a one-year waiver to performing the Principals Based Reserving according to section 61.25 of MN Standard Valuation Law, for the coinsurance on individual life business recently acquired from Allstate Life Insurance Company of New York and re-entry term and conversion life business issued on or after January 1, 2021.
A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of New York is shown below:

There were no permitted or prescribed adjustments to NAIC SAP for 2020.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations with mortality and morbidity risk are recognized as revenue when received. Premiums received from annuity policies with no mortality or morbidity risk are recorded using deposit accounting. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company follows these accounting policies:

(1) Short-term investments are stated at amortized cost.

(2) Bonds not backed by other loans are stated at amortized cost in accordance with the valuation prescribed by the Department and the NAIC. For other than temporary impairments, the cost basis of the bond is written down to fair market value as a new cost basis and the amount of the write down is accounted for as a realized loss.

(3) Common stocks are valued at fair value except that investments in the common stock of wholly owned subsidiaries and affiliates are carried on the equity basis, adjusted to reflect application of statutory principles.

(4) Highest-quality or high-quality redeemable preferred stocks (NAIC designations 1 and 2) are valued at amortized cost. All other redeemable preferred stocks (NAIC designations 3 to 6) are reported at the lower of amortized cost or fair value.

Perpetual preferred stocks are reported at fair value, not to exceed any stated call price.

(5) Mortgage loans on real estate are stated at the aggregate unpaid balance, excluding accrued interest.

(6) Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. Significant changes in estimated cash flows are accounted for using the retrospective method.

(7) The Company has no investment in subsidiaries, controlled and affiliated companies that is not addressed in either 1C(3) or 1C(8).

(8) The Company has investments in joint ventures, partnerships and limited liability companies, which are classified as other invested assets on the balance sheet. The Company values these interests based on its proportionate share of the underlying audited GAAP equity of the investee or, if audited GAAP basis financial statements are not available for the investee, may be recorded based on the underlying audited U.S tax basis equity, in accordance with SSAP No. 48 - Joint Ventures, Partnerships and Limited Liability Companies.

The investment is recorded at cost, plus subsequent capital contributions, and adjusted for the Company's share of the investee's audited GAAP basis earnings or losses and other equity adjustments, less distributions received. Distributions are recognized in net investment income to the extent they are not in excess of the undistributed accumulated earnings attributed to the investee. Distributions in excess of the undistributed accumulated earnings reduce the Company's basis in the investment.

Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern (Continued)

(9) During the second quarter of 2021 the Company purchased swaptions, which were disposed of . In accordance with SSAP 86 - Derivatives,. The derivative instruments were stated at fair value.

(10) The Company evaluates whether losses, loss adjustment expenses (LAE), and maintenance expenses exceed the recorded unearned premium reserve generally adjusted for anticipated investment income. If such condition exists, the Company records an additional liability for the deficiency, with a corresponding charge to net income. Insurance contracts are grouped in a manner consistent with how policies are marketed, serviced and measured.

(11) Unpaid losses and LAE include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for the losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined. The accident and health component is not material to the overall business.

(12) The Company has not modified its capitalization policy from the prior period.

(13) The Company has no pharmaceutical rebate receivables.

D. Going Concern

In accordance with SSAP No. 1, Accounting Policies, Risks & Uncertainties, and Other Disclosures, management has evaluated the Company's ability to continue as a going concern and has identified no issues which would impede the Company's ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors - Not Applicable

3. Business Combinations and Goodwill

A. Statutory Purchase Method

D. Loan-Backed Securities

(1) For fixed-rate agency mortgage-backed securities, Clearwater Analytics calculates prepayment speeds utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs). MIMs are derived from a semi-monthly dealer-consensus survey of long-term prepayment projections. For other mortgage-backed, loan-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody's Analytics. Moody's applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody's projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors' models.

(2) Loan-backed and structured securities with a recognized other-than-temporary impairment (OTTI)

The Company did not have any securities with a recognized other-than-temporary impairment as a result of the Company's intent to sell the security or due to the inability or intent to retain the security for a sufficient period of time to recover the amortized cost basis:

D. Among the More Significant Book to Tax Adjustments

The provision for federal income taxes incurred is different than that which would be obtained by applying the statutory federal income tax rate to income before taxes. Significant items causing these differences were permanent differences including dividends received from subsidiaries of ($5,880,221), prior year return to provision adjustments totaling $335,969, a ceding commission and other surplus adjustments of ($63,811), and a NOL carryback rate differential of ($45,238,014), all resulting in a rate increase of 45.85% to the enacted 21%.

E. Operating Loss and Tax Credit Carryforwards

(1) Unused loss carryforwards available - Not Applicable

(2) Income tax expense available for recoupment

The Tax Cuts & Jobs Act of 2017 eliminated the operating loss carryback for Life Insurance companies for losses realized after 2017. The CARES Act of 2020 established a 5-year operating loss carryback for 2018-2020. As of December 31, 2020, the company had an operating loss available for carryback. After applying the loss carryback to 2015-2018, and as of December 31, 2021, the company expects a recoupment of $121,254,022. Because the provisions under the CARES Act do not extend beyond 2020, any remaining prior year taxes are not available for recoupment in the event of future losses.

(3) Deposits admitted under IRS Code Section 6603 - Not Applicable

F. Consolidated Federal Income Tax Return

- Texas Life Insurance Company
- Wilcac Life Insurance Company
- Redding Reassurance Company 3 LLC

(2) The method of allocation among the companies is subject to written agreements approved by each Company's Board of Directors. With the exception of Redding Reassurance Company 3 LLC (Redding 3), tax allocations are based upon the separate return calculations with the credit for net losses granted when utilized on a separate company basis or in consolidation. Tax allocation between the Company and Redding 3 provides that the Company will be responsible for and pay the federal income tax liability of Redding 3 each year, as well as any tax liability incurred by Redding 3 on a stand-alone non-consolidated basis, and that the Company will not be obligated to make any payment to Redding 3 for any tax benefit generated thereby. Application of these provisions to the Company's statutory-basis financial statements results in reflection of an equal and offsetting deemed capital contributions or dividends to or from Redding 3, as the case may be, reflecting annually the tax attributes of Redding 3 undertaken by the Company. Aggregate deemed contributions made to the Company by Redding 3 were recognized in an aggregate amount of $6,295,766. For 2020, aggregate deemed contributions made to the Company by Redding 3 were recognized in the amount of $9,279,209. Intercompany tax balances are settled annually, except Texas Life, which is settled quarterly.

20. Fair Value Measurements

A. Fair Value Measurement

The Company's financial assets measured and reported at fair value have been classified, for disclosure purposes, based on a hierarchy defined by authoritative guidance. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1 – includes assets valued using inputs that are quoted prices in active markets for identical assets.

Level 2 – includes assets valued using inputs that are quoted prices for similar assets in an active market, quoted prices for identical or similar assets in a market that is not active, observable inputs, or observable inputs that can be corroborated by market data. Level 2 assets include those financial instruments that are valued by independent pricing services using models or other valuation methodologies. These models are primarily industry-standard models that consider various inputs such as interest rate, credit spread, reported trades, broker/dealer quotes, issuer spreads and other inputs that are observable or derived from observable information in the marketplace or are supported by observable levels at which transactions are executed in the marketplace.

Level 3 – includes assets valued using unobservable inputs that are used in model-based valuations that contain management assumptions. Level 3 assets include those financial instruments whose fair value is estimated based on non-binding broker prices or internally developed models or methodologies utilizing significant inputs not based on, or corroborated by, readily available market information.

At each reporting date, the Company classifies assets into the three input levels based on the lowest level of input that is significant to the measurement of fair value for each asset reported at fair value. This classification is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction and overall market conditions. The Company's assessment of the significance of a particular input to the fair value measurement and the ultimate classification of each asset requires judgment.

(1) Fair value measurements at reporting date

The Company has no liabilities and only has a limited number of assets that are measured and reported at fair value in the statement of financial position. The assets held and reported at fair value at December 31, 2021 comprise the following:

(4) The Company owns a limited number of corporate bonds, preferred stocks and hybrid securities that are in or near default and as such are rated 6 by the NAIC. These securities are required to be reported at the lower of fair value or amortized cost. The fair values of these publicly-traded securities are based on quoted market prices from widely used pricing sources such as Interactive Data Corp (IDC) or Reuters\EJV, and also may be obtained from independent third party dealers. These securities would fall within Level 2 of the fair value hierarchy.

Other invested assets: As of December 31, 2021, other invested assets included $106,987,963 of investments measured at Net Asset Value (NAV), representing the Guggenheim Partners Opportunistic Investment Grade Securities Fund, LLC. The Guggenheim Partners Opportunistic Investment Grade Securities Fund, LLC is a private investment fund which is carried based on the Company's ownership percentage of the underlying investments' Net Asset Value and so falls within NAV of the fair value hierarchy.

(5) As of December 31, 2021 the reported fair value of the Company's investment in Level 2 swap liability was $20,061,322. The Company measured the fair value of swaps using third parties prices which were estimated using industry-standard models with market-observable inputs such yield curves, volatility surface and market interest rates.

F. Subprime-Mortgage-Related Risk Exposure

(1) Classification of mortgage related securities is primarily based on information from outside data services. Certain characteristics are utilized to determine if a mortgage-backed security has sub-prime exposure.

Typical characteristics of mortgage-backed securities with sub-prime exposure are:

- Low average FICO score (< 650).
- High weighted average coupon relative to other mortgage-backed securities of similar average loan age and issue date.
- High percentage of loans with prepayment penalties (> 50%).
- Prospectus supplement indicates that underwriting standards are not "traditional", particularly with respect to credit and risk. Specific items discussed may include loan-to-value ratios, bankruptcy and foreclosure histories, and debt-to-income ratios.
- Issuer is one of several established sub-prime lenders.
- High percentage of ARM loans are 2/28 or 3/27 hybrid loans.
- High weighted average margin for ARM loans (typically > 5%).
- Very high percentage of full documentation loans (> 75%).
- Very low percentage of non-owner occupied properties (<6%).

Management practices

Credit discipline and ongoing surveillance underlie our asset manager's buy/hold/sell decisions for sub-prime securities. Our analyses include the following:

- Asset screens identify securities with specific and quantifiable risks.
- Hybrid quantitative and qualitative credit models analyze loan-level collateral composition, historical underwriter performance trends, the impact of macroeconomic factors, and issuer risks.
- Security cash flows are estimated by running credit/prepayment model outputs through cash flow waterfall and by stress testing the capital structure under various loss and prepayment scenarios.
- Third party credit, liquidity, and other idiosyncratic risks are assessed as part of a general relative value analysis.
- Surveillance and risk management is ongoing on a security level and includes monthly model calibrations.

As of December 31, 2020, the unrealized losses on the Company's subprime exposure are attributable to changes in asset values versus exposure to realized losses resulting from receiving less than anticipated cash flows or due to the potential sale of assets required to meet future cash flow requirements.

31. Reserves for Life Contracts and Annuity Contracts

1. In general, the Company calculates reserves using interpolated terminals plus unearned modal net premium with the immediate payment of claims. In some limited circumstances, the Company reports values provided by other companies using mean reserves. As such, deferred premiums are minimized. Where mean reserves are used, the Company waives deduction of deferred and fractional premiums upon death of the insured. Regardless of which reserving methodology is used, the Company returns any portion of the final premium beyond the date of death and calculates a separate reserve for this amount. Any surrender values in excess of the legally computed reserves are not split out separately.

   Reserves for deposit-type funds are equal to deposits received and interest credited to the benefit of contract holders, less withdrawals that represent a return to the contract holder. Tabular interest on deposit-type funds is calculated as the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation.

   Claim reserves, including IBNR claims, represent management's estimate of the ultimate liability associated with unpaid policy claims, based upon analysis of past experience. To the extent the ultimate liability differs from the amounts recorded, such differences are reflected in operations when additional information becomes known.

   The Company assumes business net of other inuring reinsurance. The reserve held by the Company is the reserve prior to the other reinsurance less the relevant reserve credit for the other reinsurance. Frequently the other reinsurance is paid annually regardless of the mode of the original contract. The Company limits the calculated reserve credit for the other reinsurance by limiting the reserve credit for the unearned premium portion to the lesser of the unearned reinsurance valuation net premium and the unearned reinsurance gross premium.

   Because of this difference in assumed and ceded modality, it is possible that the net reserve on a particular policy may be negative.

2. Extra premiums are charged for policies issued on substandard lives. These extra premiums are in addition to the gross premium for the true age. Reserves are determined by computing the regular reserves for the plan using the valuation mortality increased by any table ratings. Reserves for any flat extras are held at unearned premium. For any substandard annuity contracts for which it maintained appropriate documentation, the Company uses the standard mortality table rates with a constant addition at each valuation date that adjusts the standard mortality table rates equal to the original underwriting estimate. This process results in an extra mortality assumption that over time gradually declines, and substandard reserves eventually grade into standard reserves.

3. At December 31, 2021 and 2020, the Company had $4,740.1 million and $4,497.6 million respectively, of insurance in force in which the gross premiums were less than the net premiums according to the standard valuation set by the state of domicile. Reserves to cover the above insurance totaled the gross amount of $77.1 million and $62.2 million at yearend 2021 and 2020, respectively, and are reported as miscellaneous reserves in Exhibit 5.

4. The Tabular Interest has been determined by formula as described in the instructions, adjusted to reflect fractional years of interest for material reinsurance transactions. The Tabular Less Actual Reserve Released calculation and the Tabular Cost have been determined by formula as described in the instructions.

5. For the determination of Tabular Interest on funds not involving life contingencies for each valuation rate of interest, the tabular interest is calculated as the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation, adjusted for any significant reinsurance assumptions or cessions occurring during the year.
